

Environmental Policy

July 2025

Our Commitment

Residential Fire Safety Ltd. is committed to reducing the environmental impact of our operations and promoting sustainable practices throughout our fire safety training services. While we operate primarily in the digital space, we recognise that all businesses—digital or physical—have a responsibility to minimise environmental harm and support climate-conscious decision-making.

This policy is fully supported by our leadership team and applies to all employees, contractors, suppliers, and contributors to our e-learning programmes.

Our Commitment

We aim to:

- Comply fully with environmental regulations and guidance relevant to our business and sector
- Integrate sustainability into business decisions, partnerships, and procurement
- Assess environmental risks associated with our digital, office, and outreach activities
- Minimise energy usage, reduce digital server emissions, and encourage remote working practices that reduce transport-related carbon footprint
- Limit waste production and encourage digital-first delivery models that avoid unnecessary printing or packaging
- Raise awareness of environmental issues among employees and suppliers, especially where linked to housing and fire safety contexts
- Review and refine our environmental practices to align with current climate targets and resource efficiency standards

Staff Responsibility & Engagement

All Residential Fire Safety Ltd. employees are encouraged to:

- Suggest eco-friendly improvements
- Use energy-efficient equipment and cloud solutions
- Promote sustainability within client relationships and course development
- Consider environmental factors when planning outreach, course packaging, or platform updates

Digital-First Sustainability Practices

We leverage our digital training model to:

- Reduce reliance on printed materials
- Limit travel by enabling remote team collaboration
- Host courses using providers committed to energy-efficient data infrastructure
- Encourage clients to use digital certificates and LMS reporting tools to minimise physical paperwork

Monitoring & Review

This policy will be reviewed annually and updated as needed to reflect evolving environmental priorities and industry standards. The Directors are responsible for its implementation and for driving sustainable improvements throughout the company.
